PROFESSIONAL SUMMARY

AI Engineer and MCA student with experience building LLM applications, Retrieval-Augmented Generation (RAG) systems, AI agents, and workflow automation using Python. Worked with OpenAI API, LangChain, CrewAI, LangGraph, FastAPI, FAISS, ChromaDB, and machine learning libraries to develop AI applications and automation workflows.

TECHNICAL SKILLS

Languages: Python, SQL

Generative AI: OpenAI API, LangChain, Prompt Engineering, RAG

AI Agents: CrewAI, LangGraph, AutoGen, Tool Calling, Multi-Agent Systems

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Backend: FastAPI, REST APIs

Data: Pandas, NumPy, FAISS, ChromaDB

Tools: Git, GitHub, VS Code, Jupyter Notebook, n8n

PROFESSIONAL EXPERIENCE

Data Scientist Intern – Rubixe (AI Company), Bengaluru

May 2025 – Nov 2025

Role: Data Scientist Intern

- Developed machine learning pipelines for prediction and classification tasks.
- Built preprocessing and feature engineering workflows using Python.
- Worked with Pandas, NumPy, Scikit-learn, SQL, and REST APIs.
- Automated data processing and reporting workflows.
- Collaborated with the team to develop AI-based business solutions.

AI ENGINEERING PROJECTS

PDF Chat Assistant (RAG)

Python • LangChain • OpenAI API • FastAPI • FAISS • ChromaDB

Role: AI Engineer

- Built a Retrieval-Augmented Generation (RAG) chatbot for PDF documents.
- Developed document ingestion, chunking, embedding, and semantic retrieval pipelines.
- Integrated FAISS and ChromaDB for vector search.
- Developed FastAPI APIs for document-based question answering.

Multi-Agent System

Python • CrewAI • LangGraph • AutoGen

Role: AI Agent Developer

- Built multi-agent workflows using CrewAI, LangGraph, and AutoGen.
- Implemented tool-calling agents for task execution.
- Compared orchestration approaches across agent frameworks.
- Documented workflow architecture and implementation.

Data4Viz – AI Data Analysis Platform

Python • Pandas • Scikit-learn • OpenAI API

Role: AI Developer

- Built an AI-assisted exploratory data analysis platform.
- Automated preprocessing, visualization, and statistical analysis.
- Integrated GPT-4o Mini to generate dataset summaries.

- Generated business insights from structured datasets.

AI Email Agent

Python • n8n • OpenAI API

Role: AI Automation Developer

- Built an AI-powered email generation workflow.
- Integrated OpenAI API with n8n automation.
- Developed reusable workflows for email drafting and follow-up.

CERTIFICATIONS

- Certified Data Scientist – NASSCOM
- Data Scientist – IABAC
- Data Scientist Intern – Rubixe AI Solutions
- Data Scientist Trainee Certificate

ACHIEVEMENTS

1st Place – Problem Solving Hackathon | Modern College of Engineering

- Built an AI-based solution to address a real-world problem.
- Awarded 1st place for technical implementation and problem-solving.

1st Place – Hackathon | SNBP Spurthi Fest 2K26

- Secured 1st place for developing an AI-driven solution during the hackathon.
- Recognized for project execution, technical implementation, and teamwork.

EDUCATION

DPGU School of Management & Research (SMR), Pune

2025 – 2027

Master of Computer Applications (MCA) — 84%

MJ College, Jalgaon, Maharashtra

2023 – 2025

Bachelor of Computer Applications (BCA) — 75%
